Use-Case Name: 5.0 – Schedule Trading

Description: After the users confirm a trade match, they can now schedule when and where they will trade.

Preconditions: All users involved in the trade match must confirm.

Flow of Events:

Scenario Name	***Description***
Scenario 1 (Basic Flow) The users set when and where they will trade.	1. A user sets the date and time of the trade. 2. If the other user does not agree with the schedule, they will set a new schedule until both agree.
